VACANCY ANNOUNCEMENT

SUPPLY CHAIN – DIRECTOR, VALUE ANALYSIS

(Assistant Nursing Director, Administration)

DEFINITION: Value analysis is a long-term sustainable, systematic approach to improve clinical and operational performances by continuously identifying opportunities for improvement, recognizing redundancies, and implementing efficient/quality clinical practice through the standardization of equipment and supplies.

DUTIES & RESPONSIBILITIES: The following statements describe the general nature of the job duties.

- Serves as the clinical liaison at the facility level to support/direct Supply Chain Operations (SCO) Clinical Analytics for enterprise-wide clinical protocol, workflow, trials, training, and product utilization.
- Works within a team environment toward the ongoing advancement and uniformity of an enterprise-wide Supply Chain Value Analysis Management function.
- Administers advanced clinical analytic expertise to support an enterprise-wide approach to the standardization of Medical/Surgical supplies and patient care related equipment.
- Provides clinical oversight for the Department of Health Services (DHS) Medical/Surgical Formulary to support clinical efficiencies, fiscal responsibility, best practice, standardization, and establish protocols to support quality patient outcomes through evidenced based practice.
- Works directly with organizational clinical staff to provide oversight of evidence based reviews (clinical evaluation) of standardization, contractual, and supply chain logistical opportunities, including financial impact, in the review of clinical products, patient care equipment, and product utilization.
- Coordinates with facility Supply Chain Directors to actively assist with product conversions and associated clinical educational/training requirements.
- Routinely performs Value Analysis Rounds providing a clinical presence in direct patient care areas to optimize relationships and manage strategies for clinical care requirements.
- Communicates and works directly with all departmental clinical leaders to support system-wide cost saving operations and increased clinical efficiencies regarding medical supplies and equipment.
- Continuously supports and enhances effective clinical protocols and efficiencies through education, training, and monitoring of jointly established clinical practices.
- Monitors compliance with regulatory requirements and mandates that promote patient safety, quality care, and technology advancements in direct support of best possible patient care outcomes.

QUALIFICATIONS:

- A License to practice as a Registered Nurse issued by the CA Board of Registered Nursing.
- Bachelor's degree in nursing and three-years of experience in clinical nursing – OR – a Master's degree in nursing or administration and two-years of clinical experience.
- Current and reachable on the AND/A certification list or currently hold an AND/A item.
- Minimum of 18-months experience within the past five-years of Supply Chain clinical management; Product/Equipment management and ordering; medical/surgical product training, education, and conversions; or value analysis
- Good communication skills to work with all levels of clinical staff to direct, educate, and represent the clinical needs to support/direct departmental decisions for supply chain efficiencies.

If you are interested, please submit a cover letter of your interest and qualifying skills, copy of your resume, and DHR memo that you are on the AND,A certification list or hold that current item to:
